

QMS 003 - Quality Policy

Broadreach Marine provides marine project quality management, training and marine surveying throughout South Korea, East Asia and the UK. The company has been developing its expertise since its establishment in 2010 and its aim is to achieve the highest of standards for our clients in the delivery of shipbuilding and ship conversion technical supervision, and to provide bespoke technical training courses and marine surveying activities.

The company aims to achieve the above by implementing a management system that complies with the international standard of good practice BS EN ISO 9001. It also includes a commitment to meet the requirements of our clients and learn from customer feedback, and to adhere to legal and regulatory requirements. Also, to continually improve the system and helping to ensure it remains effective.

Only by providing an outstanding service and quality will we achieve our aims of long-term success and sustained improvements.

The policy, organisation, and procedures necessary to achieve the required standards are described in our Quality Management System.

We aim to:

1. Provide a high level of technical supervision for ship newbuilding projects and flawless project delivery.
2. Provide competent and high quality marine survey capabilities to Owners, Brokers and other clients.
3. Provide bespoke technical training for marine clients with certified training material in accordance with the clients' expectations.

Signed for and on behalf of Broadreach Marine (Korea) Co. Ltd. and Broadreach Marine Ltd. working as Broadreach Marine (BRM).
